# Welcome

We are glad that you have chosen to partner with Canadian Spa Company on your path to wellness, relaxation and family fun time.

We started in the pool and spa industry 45 years ago with a vision to make the benefits of hydrotherapy available to everyone. Over the last few decades, our team has worked diligently to perfect hot tub designs that include all of the features that we know our customers love in a readily available and affordable package.

We keep quality at the top of our mind every step of the way, from the components that we use within our spas, to the hydro efficiency of our insulation and heat reclamation system, to the customer care and after sales service that we provide. This is part of the reason why our products have received numerous awards and accolades throughout the industry.

(3)

## ACRYLIC SPA FEATURES

### HYDROTHERAPY JET CUSTOMISATION Directional • Rotational • Adjustable • Interchangeable

There are two different styles of jets in our spas: directional, rotational.

Each jet provides a different hydrotherapy experience.

#### Directional

#### Rotational

#### Adjustable

All jets are individually controlled and adjustable. This includes the ability to increase/decrease the flow of each jet by rotating the faceplate which allows for complete control over the massage.

Our unique design makes it easy to turn the jet face.

#### Interchangeable

Each jet can be interchanged with any other jet of the same size.

This means ultimate individual customisation for every seat in the spa.

Our diverter valve lets you concentrate the full power of our pump(s) to one or both sides of the spa giving you full control of the flow volume.

Every jet is equipped with air control valves which control the amount of air mixed into the water to further adjust the hydrotherapy massage pressure level and increase blood circulation.

### COMPONENTS FROM LEADING MANUFACTURERS

Our industry leading 15A 5HP 2 speed pump provides more power than any other pump on the market to circulate the spa water and provide a deep hydrotherapy massage.

Sensors detect water flow and pressure to circuit

Built in energy efficient heater provides hot water and is controlled by our digital control pack. Energy saving features include a daily purge system to keep hot tub pristine.

(4)

### EFFICIENT HOT TUB PLUMBING

Our oversized 2.5" intake is **25%** more efficient than the industry standard of 2" for maximum flow.

No right angle restrictions in our plumbing means better flow-through and less resistance placed on the pump.

There are no twisted or rigid corners with our FlowFlex coil pipes, allowing for maximum water pressure.

For user safety, our spas are fitted with a vacuum brake, ensuring the suction inside the spa is cut off immediately if blocked.

### 3 Step water purification

#### CANADIAN SPA COMPANY OXIDATION PROCESS

Ozone Generator + UV-C Germicidal Light + Glacier Filtration = AO<sub>3</sub>P

### UV installed AO<sub>3</sub>P system installed in every spa

Our Glacier AO<sub>3</sub>P system sterilizes up to 99.9% of bacteria in your hot tub, reducing chemical usage by up to 80% and leaving your water crystal clear!

### BACK GARDEN DELIVERY FORM

Upload your information to our site and our experienced team will provide you with a quote to move your spa from the kerb to your garden, remove the packaging and install the accessories.

Warm air rises and the majority of heat is lost through the top of the spa, this cover helps to retain the heat.

### Introducing Black Out Insulation

Black Out insulation will also increase the absorption of heat in materials up to 20%. Our innovative insulation is an industry first.

### Black Out Foam Curtain Insulation

### ABS SEALED BASE

The waterproof base is designed with a layer of the same infrared reflective material found on the cabinet walls. This prevents heat loss and moisture damage.

(5)

## FILTRATION SYSTEM

Our Digital filtration system guarantees clear water using 75% fewer chemicals

**Pre-Filter** - Fine mesh screen to prevent your filters becoming clogged.

**Silver-Ion** - Embedded into the filter, acts as a natural disinfectant and our antimicrobial filter pleats inhibit the growth of bacteria

**Mazzei Injector** - Produces smaller bubbles and creates the vacuum to pull the ozonated air into the water stream

**Ozone Purifier** - Generates ozone to aid in the oxidation of the spa water.

**Mixing Chamber** - Breaks down the ozone Bubbles and helps absorb the ozone into the water.

**UV** - Neutralises the unabsorbed ozone and neutralises bacteria in the water.

## TORONTO UV

100 sq ft Glacier filter with prefilter

Toronto UV  
6 person spa

**KH-10047**

L213 x W213 x D82cm

- 5 HP, 2 Speed Pump 15amp
- 5 HP, 1 Speed Pump 15amp
- 44 powerful adjustable jets.
- Blackout Insulation
- A03P Included

### Oversized Footwell

Oversized footwell comfortably accommodates all users feet without contact and includes foot jets.

### Built-in Step

Designed to act as an easy entrance point to the spa and stippled for a better grip. Can also be used as a cool-down seat for children.

## DIVERSE SEATING ARRANGEMENTS

### Captains Chair

Ideal seating for the primary spa user, or taller individuals. Well outfitted with jets and a comfortable LED headrest.

### Barrier Free Seating

Allows users to stretch out whilst the jets are configured to massage more areas of the body compared to a specifically moulded seat.

### No Float Lounger

An ergonomic lounger that can comfortably accommodate all users. Designed to keep your body mass lower without floating away.

# ACRYLIC SPAS

Cambridge 5 person spa  
L200 x W200 x D88cm,  
1 x 5hp pump 34 Jets, LED lights, Ozone, and Cover  
**KH-10077**

The Canadian Spa Cambridge and London SE Spas are the perfect hot tubs for you to enjoy with your friends and family. Lay back in the comfortable no-float lounger and relax while powerful adjustable hydrotherapy jets ease the knots in your back and soothe the tension in your calves.

A built-in aromatherapy system mixes warm air with aromatherapy beads to release soothing scents while premium LED lighting sets the mood.

Canadian Spa Company tubs include our Glacier water filtration system which includes Ozone water purification and Glacier Silver Ion anti-microbial filtration, ensuring crystal-clear water while limiting the amount of chemicals you need.

Anti-microbial Filters keep spa water cleaner by inhibiting bacterial growth

13 Amp inline RCD plug with 7metre/20ft cable

Thermal blanket for quicker heating and better insulation

# SWIM SPAS

**Powerful swim lane jets**  
Current River jets deliver a powerful continuous stream of water to aid straight and level swim

## SWIM SPA FEATURES

St. Lawrence 13ft swim spa  
L390 x W228 x D137cm **KS-10004**

The 13 ft. St. Lawrence Sport Pool is perfect for swimming and aqua-aerobics alike. It has 3-river resistance jets, creating our unique swim lane system. The 3-water pumps and large flat floor make it ideal for a wide range of activities, like jogging against a gentle current and experiencing the benefits of resistance training.

The water flow is fully adjustable, allowing you to customise it for any level of activity. The 13 ft. St. Lawrence also functions as a hot tub, so after a good swim, relax with a soothing massage in one of the four multi-jet Captains' Chairs or a full body 12 massage jet stand up area. The built-in digital audio system with pop up speakers provides music entertainment, perimeter multi-coloured LED lighting and 2-cascading waterfalls enhance relaxation. The waterfalls also act as a visual aid to keep your pace, all in the privacy of your own home.

St. Lawrence 16ft swim spa  
L500 x W228 x D137cm **KS-10005**

The St. Lawrence Swim Spa features a unique Swim Lane system that uses 3 resistance jets and 2 profile aligning jets to ensure that you receive the preferred pressure and support needed for swim exercise.

- 4 hydro-massage seats and 1 full length lounger. 72 massage jets
- Insulation includes high-density closed cell foam that surrounds the shell and an infrared-lined insulated cabinet that traps the heat inside the spa making it more efficient

Includes two-part hard top cover, Anti-microbial filter set, fibreglass tether pole for resistance swimming and aerobic exercise.

*Ideal for learning how to swim*

*Perfect for exercise and practice*

**Galvanised steel frame**  
Sturdy integral galvanised steel frame

St. Lawrence 20ft fully featured dual temperature/zone swim spa and hot tub  
L594 x W228 x D137cm. **KS-10006**

Enjoy the luxury of the 20 ft St Lawrence Swim Spa with dual zones for both a hot tub and a swim spa experience. Each side can be controlled independently to allow for different temperatures. The unique jet system in the swim spa provides controllable resistance for swimming and aqua-aerobics. After exercising, relax in the hot tub while adjustable hurricane jets target your back, calves and feet.

## HOW SAUNA HEATING WORKS HEATING THE BODY CORE

All sauna heating systems work in the same way to heat the core of the body.

## STANDARD FEATURES

**SOLID FRAME**  
Solid wall/stud wall, not particle or MDF board, stronger structure, less chance of warping.

Aromatherapy Oil Dispenser

Easy Clip system

Wooden floor

Low EMF

Speakers

Cool Handle

Fresh Air Vent

Exterior Lighting

High output LED Light

## CANADIAN SPA - MICA FAR INFRARED

MICA Heaters heat evenly and are more efficient than standard carbon fibre heaters and with low EMF levels and no off gassing. They are very effective at heating your body core and helping your body detox.

## EVEN SURROUND HEATING

In your Canadian Spa Far Infrared Sauna only about 20% of the heat goes to heat the air and the other 80% directly heats your body. The result is deeper tissue penetration. Health benefits start at lower heat, starting 32°C. You can set your sauna at a more comfortable temperature.

## DIGITAL CONTROLS

Easy to view and change temperature settings with our digital control panel.

## TIMER SETTING

Adjust the amount of time you wish to spend in the sauna at your desired temperature.

## PRE-HEAT SETTING

Schedule your sauna time everyday by setting up a pre-heat time so that it is always ready.

Fig1. POWER & HEATING lights illuminated to show sauna in operation

Fig 2. Press SET button and hours and minutes are displayed

(25)

## FREE-FLOW CORE

Ensures steady flow

## QUALITY FILTERS

Rigid and long-lasting 100% polyester Reemay filter fibres

## FILTERS

Increase the cleaning power of your spa with an antimicrobial spa filter! Our filters are infused with antimicrobial protection to inhibit the growth of bacteria upon the cartridge and extend the filter's life. Silver ion technology is added into the end caps and fabric of this filter, making it the most advanced filter cartridge available. Break the cycle of bacteria growth when the spa is not in use and the high demand of chemicals once it starts up. Filter should be changed every 4-6 months for best results.

## ANTIMICROBIAL TECHNOLOGY

Inhibits the growth of bacteria, mould, and fungi that can cause contamination of the filter cartridge

## SILVER STREAM

Natural silver ions stop harmful bacteria from building up inside your filter and entering your spa water

**The Canadian Spa Glacier Filters:** Antimicrobial filters with a silver ion slow release water purification system available in twinpack + pre-filter screens or single Glacier filter. These filters are compatible with the Canadian Spa Grate filter system.

2 x Glacier Antimicrobial Filters with 2 pre-filter set **KA-10032**

# HOT TUB COVERS

We manufacture our covers for our spas and replacement covers with all the features included as standard. All our covers carry the ASTM (American Society for Testing and Materials) Standard to ensure peace of mind. We carry a large stock of the most popular sizes, so we can fulfil quickly.

**Cover Comparison**

**Canadian Spa Cover:**  
25% better insulation  
No heat loss through middle seam  
Easy to lift cover from all sides  
Skirt completely seals spa  
[www.canadianspacompany.com](http://www.canadianspacompany.com)

**Other Covers:**  
Thinner cover  
Less heat efficient cover  
No side handles  
Shorter skirt does not seal spa

**8 Locking Straps**

Eight locking straps secure your cover against strong winds or unwanted access

[canadianspacompany.com](http://canadianspacompany.com)

**Full Steam Seal**

Compare our full length steam seal which insulates the entire fold of the cover and reduces heat loss

[canadianspacompany.com](http://canadianspacompany.com)

**Metal Channel**

Two parallel C-channels provide support along the entire length of the cover to protect against heavy snow loads or accidental damage

[canadianspacompany.com](http://canadianspacompany.com)

**Drainage**

Drainage grommets allow for trapped moisture to escape which keeps your cover lightweight

[canadianspacompany.com](http://canadianspacompany.com)

**5" Skirt**

A five inch skirt keeps heat inside with a snug seal that extends all the way around the spa

[canadianspacompany.com](http://canadianspacompany.com)

**Vapour Barrier**

Our 6 mil vapour barrier protects against water absorption better than the industry standard 3 mil barrier.

# ROLLING COVERS

Roll covers make it easier than ever to ensure that your swim spa is maintained correctly. Long gone are the days of thick heavy covers which required so much effort and struggle to remove, that you ended up neglecting your much-loved swim spa. The Roll On Roll Off cover is made from carbon fiber making it 25% lighter than other rolling spa covers, resulting in super easy use for anyone. In fact, they are designed to enable one person to roll the cover off in less than a minute. This cover is cleverly designed to have built-in eyelets that allow air to escape as is rolls up so it does not get bigger and bigger.

We ensure that our products are of the highest quality, and the Roll Covers are constructed with non-collapsible supports, allowing it to keep its shape in all weather conditions.

The cover is made from durable, UV protected, waterproof and weatherproof material which is securely double stitched on all the seams, to ensure the highest level of protection, even during strong winds. In addition, the Roll On/ Roll Off cover has triple thermal shield technology, which includes 3 distinct insulated layers and 2 insulating air pockets, meaning that heat is locked in, as a complete seal is created. In fact, 97% of the spa's infra-red heat is reflected back into the spa which makes the cover the most insulated part of the swim spa. This lowers the energy consumption and cost of your spa.

# BBQ SMOKER GRILLS

## ZPG-7002 PELLET GRILL WITH PID CONTROLS KG-10014

### PID CONTROLLER FOR CONSISTENT TEMPERATURES

The PID controller is a grill master's dream come true. It maintains an incredibly steady temperature throughout your cook for precision grilling. Take the guesswork out and create deliciously consistent meals every time.

### CONVENIENTLY MONITOR THE COOKING PROCESS

Achieve the ideal doneness every time. Two included temperature probes let you conveniently check internal temperatures on the large LCD control panel without lifting the lid.

### HEATS HOTTER, FASTER

Boost the smoke for maximum wood-fired flavor or get the internal temperature back up faster after you open the lid by holding the Feed button.

Enhance your grilling experience, greater flavour, easier to operate Canadian grill wood pellet barbecues are fueled by 100%-natural BBQ wood pellets.

### PELLETS

Canadian Grill premium wood pellets are made from 100% natural, food-grade hardwood to ensure that these pure wood pellets give the perfect burn for optimal wood fired flavour.

Canadian Grill premium wood pellets are made in Canada and their production is overseen from the sawmill to the shelf to provide the cleanest, healthiest fuel source available with limitless flavour combinations.

Canada has some of the world's highest quality hardwood trees.

We're pleased to bring you a pellet that is 100% natural with no artificial flavours of any kind. No binding substances, chemicals or glue.

**8-IN-1 COOKING**

## POSITIONING OF YOUR SPA

### Local Regulations:

There may be certain restrictions and/or requirements that are particular to your locality. If in doubt, check with your council.

### Delivery Passageway:

The spa will arrive as a unit, and cannot be disassembled. Ideally the spa will be placed on a trolley, either on its side or on its base.

The unit will then be rolled into place easily crossing grass, gravel, and small terrain anomalies.

If your access does not meet these conditions, or in the case of other obstacles (steps, fences, walls, steep hills, etc.) contact Canadian Spa Company

<https://youtube/6-HNPIrDpT4>

Our couriers will arrange with you for a convenient time to drop off your spa
